CPI Outlook – Monthly Report

April 2020

Monthly CPI Outlook: Still in control"

Author: Juniman – Chief Economist

CPI Review

Consumer Price Index (CPI) in March 2020 remained controlled. Monthly inflation in March reached 0.10% m-o-m lower than 0.28% m-o-m in the preceding month. Based component, inflation was mainly posted by the foods, beverage, and tobacco component increased by 0.10% m-o-m, the personal care and other services component rose by 0.99% m-o-m and the clothing and footwear component experienced rose by 0.12% m-o-m. Furthermore, the Food and Beverage Provision/Restaurant component rose by 0.23% m-o-m, the Household Equipment, Equipment and Routine Maintenance component rose by 0.28% m-o-m, and the health component rose by 0.21% m-o-m. Meanwhile, the deflation was mainly posted by the transportation component fell by 0.43% m-o-m and the information, communication, and financial service component fell by 0.09% m-o-m.

Inflation in the food, beverage and tobacco component in March 2020 mainly stemmed from higher prices of Eggs, onion, sugar, spinach, kale, grapes, oranges, cigarette, white cigarette, and filter cigarette. Inflation in the personal care and other services component in March 2020 mainly stemmed from higher prices of gold and jewelry.

Furthermore, inflation in the clothing and footwear component in March 2020 mainly came from higher prices of footwear subsector. Inflation in the Food and Beverage Provision/Restaurant component in March 2020 mainly stemmed from higher prices of rice with meal and "soto".

Moreover, inflation in the Household Equipment, Equipment and Routine Maintenance component in March 2020 mainly came from higher prices of detergent soap. Inflation in the health component in March 2020 still came primarily from higher prices of medicines and health products sub-sector

Meanwhile, deflation in the transportation component in March 2020 still came primarily from lower prices of air freight rates. Deflation in the information, communication, and financial service component in March 2020 mainly stemmed from higher prices of information and communication equipment sub-sector.

On a yearly basis, inflation remains in check with the downward trend still intact, as the inflation eased to 2.96% y-o-y in March 2020 compare 2.98% y-o-y in the previous month. Nevertheless, year to date inflation in January-March 2020 reached 0.76% higher than 0.35% for the same time frame in 2019.

CPI Outlook

We expect monthly inflation to be higher in April 2020 compared to the previous month. This is caused by Ramadhan effects that usually increase demand for goods and services. Price increases occur in the foods, beverage, and tobacco components such as onion, oranges, sugar, mineral water, rice, "tempe", "tahu", cigarette, filter cigarette, and white cigarette. Furthermore, this month's inflationary pressures were also caused by increases in glod and jewelry price inline with the rising of international gold price. Meanwhile, deflationary pressures were caused by decrease in prices of red pepper, chicken meat, eggs, garlic, and air freight rates. However, overall inflation in this month is still in control. Based on these factors, we expect the consumer price index in April 2020 will reach 0.15% m-o-m, higher than 0.10 m-o-m in March 2020. However, we expect the yearly inflation rate in April 2020 will decrease to 2.75% y-o-y from 2.96% y-o-y in March 2020.

Meanwhile, we expect monhtly core inflationary pressures may decrease in April 2020. The pressure mainly comes from the increase in price of gold jewelry. We expect core inflation in April 2020 will reach 0.12% m-o-m, lower than 0.29% m-o-m in March 2020. Furthermore, we expect the yearly core inflation in April 2020 may slightly decrease to 2.86% y-o-y from 2.87% y-o-y in the previous month.
