1

Earnings

- PBT recorded at Rp2.0 trillion, dipped 7.4% from Rp2.2 trillion the year before. This was primarily due to lower loan yields, following tight competition within the industry, as well as a drop in Global Markets (GM), Bancassurance and wealth management incomes. However, the Bank continued to improve its cost of funds and booked lower provisions in line with improving loan quality.
- The Bank recorded a drop in **fee-based income** of 15.8%. This was mainly contributed by the significant drop in GM related fees which fell 62.7%, impacted by the spike in global interest rates and volatile markets.
- **Overhead cost** (OHC) maintained at Rp5.6 trillion, increased by 3.6% YoY.
- The Bank continued to proactively manage the asset quality which has resulted in the improvement of **loan loss provisions** by 17.8% to Rp1.3 trillion.
- **NIM** expanded by 36bps YoY to 5.05% contributed by lower cost of funds, higher CASA balance and growth in the higher margin auto-loan businesses.

2

Loans Growth and Asset Quality

- Overall **Loans** grew by 5.9% YoY driven by higher loan demands in large-scale enterprises and corporate entities and improved consumer purchasing power led to a significant increase in the Bank's retail loan segments.
- GB grew 7.1% and CFS Retail grew 13.6%. Achievement in CFS retail was supported by growth across all segments (Auto, Mortgage, and unsecured loans)
- Meanwhile, CFS Non Retail declined by 4.5% YoY, although RSME managed to book 4.5% YoY growth.
- **Gross NPL** improved YoY to 3.46% and **gross impaired loans ratio** improved YoY to 4.29% due to lower NPL and impaired loans balances supported by higher loan balances.
- The Bank's Loan at Risk (LAR) improved to 12.72% in Dec-22 from 18.01% in Dec-21, which was attributed by a general improvement of loan quality..
- The Bank maintained a prudent banking approach and continued to apply a conservative risk posture.

3

Liquidity and Funding Positions

- Funding profile was maintained as reflected in improvement **CASA ratio** to 51.41%. Total deposits decreased by 8.0% YoY mainly from TD which decreased by 15.3% YoY, in line with the Bank's strategy to maintain low-cost funding by leveraging the Bank's digital services to acquire customer deposits and reduce high cost of funding.
- Healthy liquidity indicators: **Loan-to-Deposit Ratio (LDR - bank only)** at 86.92%, and modified LDR (bank only) at 78.06% as of Dec-22. **Liquidity Coverage Ratio (LCR - bank only)** quarterly stood at 168.50% as of Dec-22, well above minimum requirement.

4

- **Non-Performing Financing (NPF)** gross improved to 3.02% in Dec-22 from 3.73% in Dec-21 as Shariah financing grew.
